I am under attack constantly as often as every 3 min while I am on the inside of the house. My life is a living hell inside of the house.

I am still working with all the doctors and showing them the recordings of the last 5 months trying to understand why a woman who earned \$200,000 till the day prior to a surgery would become this seriously ill and not even exhibit those symptoms outside of the home?

Under these kind of harsh interrupts as often as 3 min where the brain can't keep anything straight, I am doing my best to find a job.

Hope that is enough of an update.

Hopefully things are going well at your end while u try to find answers for me with psychiatrists or neurologists or private investigators.

Hopefully u have also received the recordings of the weekend containing the 80 videos in January the week of 22nd I believe, and a copy of all my medical records

I am also attaching a copy of the private investigator report.

Also I am sending across a link to a website I put together that has all the information pertinent to my case for any lawyer that will hopefully do a better job on my next commitment.

You might want to go thru the links and educate yourself. It is kept as concise as possible.

use that information with an investigator in India and think why would such a career oriented kid become this ill explosively after a surgery, only on the inside of the home, gets physically and emotionally abused, get stolen of all the jewelry that her husband had his eyes on from the get go and wanted to possess from the get go, gets taken over off every cent where she has to go to him for his basic needs, get reduced to \$2 cheap coffees, \$10 cheap clothes, fighting so hard to find a job with her mental health profile listed across town and is unable to find a job, then gets ensured of no access to her children.

What kind of case is it?

AVictimOfOrganizedCrime

Hopefully that answers your question.
